

## THE ANGUS OFFERING...

The Angus breed is without doubt in the driver's seat in the beef cattle industry. Number one in registrations, a database that is second to none and a marketing arm through Certified Angus Beef that is recognized world wide.

Because of the large number of cattle that the Angus breed has in their data base we encourage producers to primarily look at the EPD's when evaluating this offering of bulls. We have put the raw numbers in the catalog; however especially in the case of ultrasound numbers and the differences in technicians and the labs at which these images are evaluated the EPD's for the traits of REA, IMF and Fat and where they rank compared to breed average are a much better indicator of that animal's genetic strength.

Carcass quality has been a buzz word in the industry for the past several years and no breed of beef cattle brings more to the table from that regard in helping commercial cow herds than does the Angus breed.

The Angus bulls that we will offer on March 24<sup>th</sup> accomplish this plus many offered are bigger, stouter and more rugged bulls with excellent scrotal size. Many of these bulls have been designed with less hair and a tolerance for fescue bred in that can be an added benefit to many producers.
